

## Special Issue

# Molecules at Play in Cancer

### Message from the Guest Editor

Even with a wide range of incidence, cancer can occur in any part of the human body and spread to areas other than the originally affected organ. From genes to transcripts, proteins (enzymes included) and metabolites, a long list of molecular factors have been blamed for triggering the transformation of normal cells into cancer cells, many of them also being considered as actionable molecules for targeted therapies.

However, combinations of cancer risk factors including race, sex, age, medical history, diet, habits and exposure to stress, toxins and radiation make each human dynamic and unique, questioning the meaning of cancer biomarkers and the feasibility of “fit-for-all” treatments. Tumor heterogeneity further complicates the characterization of cancer subtypes and requires complex approaches to destroy most of the primary cancer clones at once. Contributing papers to this Special Issue will present recent progress in the molecular diagnosis and targeted therapy of any type of cancer, with emphasis on how to better personalize the treatment to fit patient characteristics.

## About the Journal

### Message from the Editor-in-Chief

---

#### Editor-in-Chief

Prof. Dr. Madhav Bhatia

Department of Pathology and Biomedical Science, University of Otago,  
Christchurch, 2 Riccarton Avenue, P.O. Box 4345, Christchurch 8140,  
New Zealand

---

#### Author Benefits

##### High Visibility:

indexed within Scopus, SCIE (Web of Science), PMC,  
PubMed, Embase, CAPus / SciFinder, FSTA, AGRIS, and  
other databases.

##### Rapid Publication:

manuscripts are peer-reviewed and a first decision is  
provided to authors approximately 17.8 days after  
submission; acceptance to publication is undertaken in 2.7  
days (median values for papers published in this journal in  
the first half of 2025).

##### Recognition of Reviewers:

APC discount vouchers, optional signed peer review, and  
reviewer names are published annually in the journal.
