

## Special Issue

# Genetic Sight: Plant Traits during Postharvest

### Message from the Guest Editor

The growing consumption pattern of fruits and vegetables requires consistent production, reliable postharvest management/technologies, and distribution without compromising quality. However, fresh fruits and vegetables remain metabolically active after harvest and undergo ripening and senescence processes. If proper postharvest management/technologies are not implemented, postharvest losses are inevitable due to the susceptibility of fresh commodities to developing postharvest diseases, injuries, and disorders. In recent years, advanced research on the integration of molecular biology, biochemistry, genetics, next-generation sequencing, and cell biology has had an enormous impact on horticultural crops. By the same token, molecular research during postharvest could contribute to reducing postharvest losses.

Understanding the molecular mechanisms involved in postharvest processes could help to breed resistant cultivars and improve postharvest technologies for controlling physiological changes. This Special Issue warmly welcomes molecular studies related to postharvest management/technologies of horticultural crops.

## About the Journal

### Message from the Editor-in-Chief

---

#### Editor-in-Chief

Prof. Dr. Madhav Bhatia

Department of Pathology and Biomedical Science, University of Otago,  
Christchurch, 2 Riccarton Avenue, P.O. Box 4345, Christchurch 8140,  
New Zealand

---

#### Author Benefits

##### High Visibility:

indexed within Scopus, SCIE (Web of Science), PMC,  
PubMed, Embase, CAPus / SciFinder, FSTA, AGRIS, and  
other databases.

##### Rapid Publication:

manuscripts are peer-reviewed and a first decision is  
provided to authors approximately 17.8 days after  
submission; acceptance to publication is undertaken in 2.7  
days (median values for papers published in this journal in  
the first half of 2025).

##### Recognition of Reviewers:

APC discount vouchers, optional signed peer review, and  
reviewer names are published annually in the journal.
