

Environmental Engineering Perspectives on Waste Management, Nature-Based Solutions (NbS) and Green/Blue Infrastructure

Guest Editors:

Prof. Dr. Joseph Akunna

School of Applied Science,
Division of Engineering and Food
Sciences, University of Abertay,
Bell Street, Dundee DD1 1HG,
Scotland, UK

Dr. Kiran Tota-Maharaj

Department of Civil Engineering,
School of Infrastructure and
Sustainable Engineering, College
of Engineering and Physical
Sciences, Aston University,
Birmingham B4 7ET, UK

Deadline for manuscript
submissions:

31 July 2024

Message from the Guest Editors

We would like to extend an invitation to you to submit your paper to this Special Issue on “Environmental Engineering Perspectives on Waste Management, Nature-Based Solutions (NbS), and Green Infrastructure”. This Special Issue provides an excellent platform for discussing the critical issues related to the environment and sustainability. We believe that your expertise and knowledge in this field will contribute immensely to this Special Issue’s success. The significance of waste management through nature-based solutions, green infrastructure and environmental engineering practices cannot be overstated. The need to manage waste sustainably, promote nature-based solutions (NbSs) and adopt green infrastructure has become more critical in recent times. These issues are not only critical for maintaining a healthy and sustainable environment, but also for promoting economic and social sustainability. In this Special Issue, we are particularly interested in papers that explore the various aspects of environmental [...] For further reading, please follow the link to the Special Issue Website at: [https://www.mdpi.com/journal/](https://www.mdpi.com/journal/cleantechnol/special_issues/NGX2RZY389)

Message from the Editor-in-Chief

Clean Technologies (ISSN 2571-8797) is an international, open access journal of novel scientific research on technology development aimed at reducing the environmental impact of human activities. *Clean Technologies* publishes reviews, regular research papers, communications and short notes which show a significant advance in the development of sustainable technology that reduces energy consumption, environmental pollution and/or the use of water and nonrenewable resources. Our aim is to encourage scientists to publish their experimental and theoretical research in detail as open access, serving a trustable base of advance for the scientific community.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [ESCI \(Web of Science\)](#), [Inspec](#), [AGRIS](#), [RePEc](#), and [other databases](#).

Journal Rank: CiteScore - Q2 (*Environmental Science (miscellaneous)*)
