

Special Issue

Technology for Sustainable Cities, Companies and Responsible Consumers

Message from the Guest Editors

This Special Issue focusses on the role of clean technologies in advancing sustainability in urban environments, corporate practices, and consumer lifestyles. Global challenges such as climate change and resource depletion have created the need for innovative technologies and solutions that reduce environmental footprints, such as renewable energy, energy-efficient systems, circular manufacturing, remanufacturing, and sustainable mobility. In cities, smart technologies, green infrastructure, and low-carbon transportation are transforming urban sustainability. In addition, companies are adopting circular economy principles, eco-friendly production methods, remanufacturing, and carbon-neutral strategies to enhance their corporate responsibility. Consumers are creating demand for sustainable products and services through conscious consumption and digital engagement. This Special Issue presents state-of-the-art research, case studies, and policy insights that highlight how clean technology is redefining industries and everyday life. By fostering interdisciplinary dialog, it aims to promote scalable, technology-driven sustainability solutions for a more sustainable future.

About the Journal

Message from the Editor-in-Chief

Clean Technologies (ISSN 2571-8797) is an international, open access journal of novel scientific research on technology development aimed at reducing the environmental impact of human activities. *Clean Technologies* publishes reviews, regular research papers, communications and short notes which show a significant advance in the development of sustainable technology that reduces energy consumption, environmental pollution and/or the use of water and nonrenewable resources. Our aim is to encourage scientists to publish their experimental and theoretical research in detail as open access, serving a trustable base of advance for the scientific community.

Editor-in-Chief

Prof. Dr. Patricia Luis Alconero

Materials & Process Engineering, UCLouvain, Place Sainte Barbe 2,
1348 Louvain-la-Neuve, Belgium

Author Benefits

High Visibility:

indexed within Scopus, ESCI (Web of Science), Inspec, AGRIS, RePEc, and other databases.

Journal Rank:

JCR - Q2 (Environmental Sciences) / CiteScore - Q1
(Environmental Science (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 33.7 days after submission; acceptance to publication is undertaken in 5.8 days (median values for papers published in this journal in the first half of 2025).
