Topical Collection

Bioenergy Technologies

Message from the Collection Editor

This Topical Collection looks for original contributions regarding technological developments focused on the production of energy from biomass or/and organic waste, and its assessment in a circular economy context. Topics include, but are not limited to, bio-based processes for the conversion of organic material, e.g., alcoholic fermentation, anaerobic digestion, microbial fuel cells, photobiologic hydrogen synthesis and transesterification; the thermo-chemical conversion of organic materials, e.g., direct combustion, gasification, liquefaction and pyrolysis; bioenergy production and the economic/environmental impacts.

About the Journal

Message from the Editor-in-Chief

Clean Technologies (ISSN 2571-8797) is an international, open access journal of novel scientific research on technology development aimed at reducing the environmental impact of human activities. *Clean Technologies* publishes reviews, regular research papers, communications and short notes which show a significant advance in the development of sustainable technology that reduces energy consumption, environmental pollution and/or the use of water and nonrenewable resources. Our aim is to encourage scientists to publish their experimental and theoretical research in detail as open access, serving a trustable base of advance for the scientific community.

Editor-in-Chief

Prof. Dr. Patricia Luis Alconero
Materials & Process Engineering, UCLouvain, Place Sainte Barbe 2, 1348 Louvain-la-Neuve, Belgium

Author Benefits

High Visibility:

indexed within Scopus, ESCI (Web of Science), Inspec, AGRIS, RePEc, and other databases.

Journal Rank:

JCR - Q2 (Environmental Sciences) / CiteScore - Q1 (Environmental Science (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 33.7 days after submission; acceptance to publication is undertaken in 5.8 days (median values for papers published in this journal in the first half of 2025).
