Message from the Guest Editors

Dear Colleagues,

We would like to invite you to contribute to our Special Issue of *Climate*, which is intended to collect manuscripts devoted to studying climate change impacts on freshwater resources, either in various regions of the world from a global viewpoint, possibly focused on regionalization. Both contributions related to the evaluation of the past based on observed instrumental data or to the projections of future states based on climate models are welcome.

On the occasion of organizing two upcoming conferences in Czechia, the Czech and Slovak Hydrological Days 2021 and, the XXIX Conference of the Danubian Countries, high-quality contributions to these events will be preferred, and studies related to the Danube, Elbe and Oder river basins will be of the utmost interest. Both large-scale studies as well as small-scale studies will be selected for publication after peer review, possibly focused on whole basins or their headwaters, respectively. However, contributions representing other regions are welcome as well. Potential contributors who do not know if their topic fits the scope of the Special Issue are encouraged to contact the main Guest Editor, Dr. Ondrej Ledvinka.
