

Special Issue

Sustainable Development Pathways and Climate Actions

Message from the Guest Editor

Sustainable development pathways and climate actions offer an integrated approach to tackling the intertwined challenges of environmental degradation and socio-economic disparities. We welcome contributions from diverse social science and humanities disciplines, including environmental studies, sociology, economics, political science, urban planning, and more.

Interdisciplinary studies are especially encouraged.

Potential topics include, but are not limited to:

- (1) Climate-resilient urban and rural development strategies.
- (2) Sustainable energy transitions and their socio-economic impacts.
- (3) Nature-based solutions for climate adaptation and mitigation.
- (4) Equity, justice, and inclusivity in sustainable development pathways.
- (5) Innovations in climate policy, governance, and financing mechanisms.
- (6) The role of indigenous knowledge and community-led approaches in sustainable climate actions.
- (7) Technological innovations for sustainable development and climate mitigation.
- (8) Measuring and monitoring progress in aligning SDGs with climate goals.
