

Special Issue

Climate Change Adaptation: Financial Instruments and Policy Interventions

Message from the Guest Editors

Climate change is causing considerable challenges for agricultural producers and other value chain actors. Furthermore, fluctuations in production endanger food security in many countries worldwide, especially in developing countries. The scientific community is discussing various adaptation strategies along the value chains. The aim of this Special Issue is to investigate the role of financial instruments, mechanisms, and policy interventions in terms of increasing the resilience of actors along the value chains, from producer to consumers. We highly welcome particularly studies investigating the role of credits, insurances, state support and protection programs on reducing climate vulnerability of agricultural producers and consumers.

Author Benefits

High Visibility:

indexed within Scopus, ESCI (Web of Science), GeoRef, AGRIS, and other databases.

Journal Rank:

JCR - Q2 (Meteorology and Atmospheric Sciences) /
CiteScore - Q2 (Atmospheric Science)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21.6 days after submission; acceptance to publication is undertaken in 3.9 days (median values for papers published in this journal in the first half of 2025).
