

Special Issue

Anthropogenic Climate Change: Social Science Perspectives

Message from the Guest Editor

Ongoing social science understanding of climate change is critical for addressing the complexity and seriousness of the climate crisis. While the study of climate change is inherently interdisciplinary, we wish to acknowledge that the drivers of greenhouse gas emissions are rooted in human behavior. Further, we can also acknowledge that the solutions to this enormous problem are primarily social, requiring political, economic, and educational foci. This Special Issue will provide a forum for social science research to demonstrate how the social sciences can contribute useful methods and data, critical perspectives, and creative insight into climate change mitigation and adaptation efforts.

About the Journal

Message from the Editor-in-Chief

Editor-in-Chief

Dr. Timothy G. F. Kittel
Institute of Arctic and Alpine Research, University of Colorado Boulder,
Boulder, CO 80309-0450, USA

Author Benefits

High Visibility:

indexed within Scopus, ESCI (Web of Science), GeoRef, AGRIS, and other databases.

Journal Rank:

JCR - Q2 (Meteorology and Atmospheric Sciences) /
CiteScore - Q2 (Atmospheric Science)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21.6 days after submission; acceptance to publication is undertaken in 3.9 days (median values for papers published in this journal in the first half of 2025).
