

## Special Issue

# Ecological Modeling for Adaptation to Climate Change

### Message from the Guest Editor

The aim of this Special Issue is to highlight the importance of ecological niche models in the context of climate change and its impacts on species and ecosystems. This Special Issue welcomes manuscripts that delve into various aspects of ecological niche models concerning climate change impacts on species and ecosystems. Suggested themes and article types for submissions include, but are not limited to:

- Novel approaches in ecological niche modeling for climate change predictions;
- Developing climate variables to facilitate ecological niche modeling;
- Case studies investigating the projected distribution shifts of specific plant and animal species in response to climate change;
- Integrating ecological niche models with other tools, such as remote sensing data, to enhance accuracy and applicability;
- Developing adaptive management strategies based on ecological niche model predictions for species conservation;
- Reviews or meta-analyses summarizing the current state of knowledge in ecological niche modeling and its relevance to climate change research.

## About the Journal

### Message from the Editor-in-Chief

---

#### Editor-in-Chief

Dr. Timothy G. F. Kittel  
Institute of Arctic and Alpine Research, University of Colorado Boulder,  
Boulder, CO 80309-0450, USA

---

#### Author Benefits

##### High Visibility:

indexed within Scopus, ESCI (Web of Science), GeoRef, AGRIS, and other databases.

##### Journal Rank:

JCR - Q2 (Meteorology and Atmospheric Sciences) /  
CiteScore - Q2 (Atmospheric Science)

##### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21.6 days after submission; acceptance to publication is undertaken in 3.9 days (median values for papers published in this journal in the first half of 2025).
