

Topical Collection

Adaptation and Mitigation Practices and Frameworks

Message from the Collection Editor

These manuscripts should present novel applications of framework, technology, or technique to the fields of adaptation and mitigation. These applications may be presented in the context of best practices, human dimensions, and case studies. They provide an opportunity to share findings from programmatic and practice-based efforts that were not designed as research but are nonetheless of interest to research and professional communities. Evidence for the efficacy of applications should be thoroughly presented within the context of scientific and professional literature. Dr. Chris Swanston

About the Journal

Message from the Editor-in-Chief

Climate (ISSN 2225-1154) was established in 2013 to provide an open-access outlet for innovative research, review articles, new direction papers, and short communications relevant to all disciplines related to climate at all scales. The journal encourages papers ranging from climate change detection and attribution and Earth system modeling to ecosystem, hydrologic, and socioeconomic impacts and climate mitigation and adaptation measures. The influence of *Climate* is strong and growing (IF 3.2 in 2024, CiteScore 5.7 in 2024).

Editor-in-Chief

Dr. Timothy G. F. Kittel

Boulder, CO 80309-0450, USA

Author Benefits

High Visibility:

indexed within Scopus, ESCI (Web of Science), GEOBASE, GeoRef, AGRIS, and other databases.

Journal Rank:

JCR - Q2 (Meteorology and Atmospheric Sciences) /
CiteScore - Q2 (Atmospheric Science)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 20.8 days after submission; acceptance to publication is undertaken in 3.8 days (median values for papers published in this journal in the second half of 2025).
