

Special Issue

Facilitating Low-Carbon Transitions through Emissions Trading Systems

Message from the Guest Editor

The Special Issue aims to discuss low-carbon transitions through emission trading systems. It aims to analyze why it is in the interest of countries to decarbonize their economies and will provide an analysis of the situation in several countries. The Special Issue will specifically look at how decarbonization is taking shape with regard to these markets. In doing so, it will analyze the regulatory environment in various jurisdictions to identify to what extent it is conducive to decarbonization. It will also offer recommendations for how regulation can be more encouraging. It will assess current regulations and identify areas for improvement. You may share this invitation with your team members and colleagues. Please let me know if you and your colleagues are interested in submitting a manuscript to this Special Issue.

About the Journal

Message from the Editor-in-Chief

Climate (ISSN 2225-1154) was established in 2013 to provide an open-access outlet for innovative research, review articles, new direction papers, and short communications relevant to all disciplines related to climate at all scales. The journal encourages papers ranging from climate change detection and attribution and Earth system modeling to ecosystem, hydrologic, and socioeconomic impacts and climate mitigation and adaptation measures. The influence of *Climate* is strong and growing (IF 3.2 in 2024, CiteScore 5.7 in 2024).

Editor-in-Chief

Author Benefits

High Visibility:

indexed within Scopus, ESCI (Web of Science), GeoRef, AGRIS, and other databases.

Journal Rank:

JCR - Q2 (Meteorology and Atmospheric Sciences) /
CiteScore - Q2 (Atmospheric Science)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21.6 days after submission; acceptance to publication is undertaken in 3.9 days (median values for papers published in this journal in the first half of 2025).
