Special Issue

Social-Ecological Systems, Climate and Global Change Impacts

Message from the Guest Editor

This Special Issue was inspired by the IUFRO (International Union of Forest Research Organizations) 8.01.02 Landscape Ecology conference "The Green-Blue Nexus". The topic addresses the conflict between provisioning services (biomass, food, fodder, etc. = the "Green") and regulating services (e.g., drinking water provisioning, irrigation water, flood and erosion control = the "Blue") in relation to other impacts on biodiversity and the supporting structures and key ecological processes that enable the supply of these services. Important drivers, such as climate and global change and their impacts on ecosystem functioning, processes, pattern, and services will be discussed and policy implications should be addressed in the papers. Keywords:

- ecosystems
- societies
- drivers
- governance
- land management
- land use planning

About the Journal

Message from the Editor-in-Chief

Climate (ISSN 2225-1154) was established in 2013 to provide an open-access outlet for innovative research, review articles, new direction papers, and short communications relevant to all disciplines related to climate at all scales. The journal encourages papers ranging from climate change detection and attribution and Earth system modeling to ecosystem, hydrologic, and socioeconomic impacts and climate mitigation and adaptation measures. The influence of Climate is strong and growing (IF 3.2 in 2024, CiteScore 5.7 in 2024).

Editor-in-Chief

Author Benefits

High Visibility:

indexed within Scopus, ESCI (Web of Science), GeoRef, AGRIS, and other databases.

Journal Rank:

JCR - Q2 (Meteorology and Atmospheric Sciences) / CiteScore - Q2 (Atmospheric Science)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21.6 days after submission; acceptance to publication is undertaken in 3.9 days (median values for papers published in this journal in the first half of 2025).
