

Special Issue

Climate Change and Deforestation and Forest Degradation

Message from the Guest Editors

We are inviting you to submit your manuscripts to this Special Issue of *Climate*: “Climate Change and Deforestation and Forest Degradation”. Forests and climate change interact with each other. On the one hand, climate change has impacted and will continue to impact forest ecosystems and forestry. On the other hand, forests and forestry can play an important role in sequestering and storing carbon to offset greenhouse gas emissions while adapting to a changing climate. Research and review articles that involve multidisciplinary efforts or innovative approaches are especially encouraged. Articles targeting any forest types and regions are welcome.

Guest Editors

Prof. Dr. Jianbang Gan

Dr. Guangyu Wang

Prof. Dr. Yeo-Chang Youn

Deadline for manuscript submissions

Boulder, CO 80309-0450, USA

Author Benefits

High Visibility:

indexed within Scopus, ESCI (Web of Science), GeoRef, AGRIS, and other databases.

Journal Rank:

JCR - Q2 (Meteorology and Atmospheric Sciences) /
CiteScore - Q2 (Atmospheric Science)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21.6 days after submission; acceptance to publication is undertaken in 3.9 days (median values for papers published in this journal in the first half of 2025).
