Special Issue

Climate Change, Hydrology and Freshwater Resources

Message from the Guest Editors

We would like to invite you to contribute to our Special Issue of Climate, which is intended to collect manuscripts devoted to studying climate change impacts on freshwater resources, either in various regions of the world from a global viewpoint, possibly focused on regionalization. Both contributions related to the evaluation of the past based on observed instrumental data or to the projections of future states based on climate models are welcome. On the occasion of organizing two upcoming conferences in Czechia, the Czech and Slovak Hydrological Days 2021 and, the XXIX Conference of the Danubian Countries, high-quality contributions to these events will be preferred, and studies related to the Danube. Elbe and Oder river basins will be of the utmost interest. Both large-scale studies as well as small-scale studies will be selected for publication after peer review, possibly focused on whole basins or their headwaters, respectively. However, contributions representing other regions are welcome as well. Potential contributors who do not know if their topic fits the scope of the Special Issue are encouraged to contact the main,.

About the Journal

Message from the Editor-in-Chief

Climate (ISSN 2225-1154) was established in 2013 to provide an open-access outlet for innovative research, review articles, new direction papers, and short communications relevant to all disciplines related to climate at all scales. The journal encourages papers ranging from climate change detection and attribution and Earth system modeling to ecosystem, hydrologic, and socioeconomic impacts and climate mitigation and adaptation measures. The influence of Climate is strong and growing (IF 3.2 in 2024, CiteScore 5.7 in 2024).

Editor-in-Chief

Author Benefits

High Visibility:

indexed within Scopus, ESCI (Web of Science), GeoRef, AGRIS, and other databases.

Journal Rank:

JCR - Q2 (Meteorology and Atmospheric Sciences) / CiteScore - Q2 (Atmospheric Science)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21.6 days after submission; acceptance to publication is undertaken in 3.9 days (median values for papers published in this journal in the first half of 2025).
