

## Special Issue

# Shoulder Disorders: Diagnosis and Treatment

### Message from the Guest Editor

Dear Colleague, Shoulder pain is a very frequent complaint. Numerous pathological conditions, such as calcific tendinopathy of the rotator cuff, adhesive capsulitis, subacromial-subdeltoid bursitis, acromioclavicular or glenohumeral arthritis, tenosynovitis of the long bicep tendon, rotator cuff tendon tears, and numerous other less common conditions, may be the cause of painful shoulders. The goal of this Special Issue is to include a collection of up-to-date papers focused on the diagnosis and treatment of all these conditions. Particularly, novel imaging methods for diagnosis and minimally invasive image-guided treatments used in attempt to alleviate painful shoulders will be included.

---

### Guest Editor

Dr. Paolo Spinnato

Diagnostic and Interventional Radiology, IRCCS Istituto Ortopedico Rizzoli, Bologna, Italy

## About the Journal

### Message from the Editor-in-Chief

---

#### Editor-in-Chief

Dr. Athanassios A. Kyrgidis  
Department of Oral and Maxillofacial Surgery, School of Dentistry,  
Faculty of Health Sciences, Aristotle University, Thessaloniki, Greece

---

#### Author Benefits

##### High Visibility:

indexed within Scopus, ESCI (Web of Science), PubMed, PMC, Embase, and other databases.

##### Journal Rank:

JCR - Q2 (Medicine, General and Internal) / CiteScore - Q2 (General Medicine)

##### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 22.7 days after submission; acceptance to publication is undertaken in 3.8 days (median values for papers published in this journal in the first half of 2025).
