Advances in Rheumatology: Innovations in Diagnosis, Treatment and Personalized Care

Message from the Guest Editor

In recent decades, significant advances in immunology, molecular biology, and clinical research have provided new insights into rheumatic diseases pathogenesis, refined diagnostic modalities, and expanded therapeutic options. These developments are progressively moving the field toward precision medicine, with the aim of tailoring interventions to specific disease mechanisms and individual patient characteristics.

This Special Issue, entitled “Advances in Rheumatology: Innovations in Diagnosis, Treatment and Personalized Care,” welcomes contributions that address diverse domains, including but not limited to the identification of novel biomarkers, innovations in imaging and diagnostic technologies, and the development of targeted therapeutic agents and individualized treatment strategies. Together, these works underscore the importance of integrating basic, translational, and clinical research to advance our understanding of rheumatic diseases.

It is our hope that this Special Issue will provide valuable perspectives, stimulate further investigation, and contribute to the ongoing refinement of personalized approaches to the care of patients with rheumatic disorders.

About the Journal

Message from the Editor-in-Chief

Editor-in-Chief

Dr. Athanassios A. Kyrgidis
Department of Oral and Maxillofacial Surgery, School of Dentistry,
Faculty of Health Sciences, Aristotle University, Thessaloniki, Greece

Author Benefits

High Visibility:

indexed within Scopus, ESCI (Web of Science), PubMed, PMC, Embase, and other databases.

Journal Rank:

JCR - Q2 (Medicine, General and Internal) / CiteScore - Q2 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 22.7 days after submission; acceptance to publication is undertaken in 3.8 days (median values for papers published in this journal in the first half of 2025).
