Advances in Thromboembolism: Precision Prevention and Clinical Management

Message from the Guest Editors

Venous thromboembolism remains a leading cause of morbidity and mortality worldwide. In recent years, the field has advanced toward individualized approaches through a better understanding of pathophysiological mechanisms, risk stratification tools, and the emergence of precision medicine. The incorporation of biomarkers, machine learning, and refined clinical prediction models has paved the way for more accurate risk assessment and the development of tailored prevention strategies. This Special Issue aims to gather original research and high-quality reviews that explore the full spectrum of thromboembolism, from molecular mechanisms and innovative diagnostic tools to novel therapeutic strategies. We particularly welcome contributions focusing on special clinical scenarios, such as cancer-associated thrombosis, thrombosis in transgender populations, and pregnancy, as well as studies incorporating artificial intelligence or real-world data. We invite you to submit original articles, reviews, meta-analyses, and clinical studies related to the mechanisms, diagnosis, risk prediction, and personalized management of thromboembolic disease.

About the Journal

Message from the Editor-in-Chief

Editor-in-Chief

Dr. Athanassios A. Kyrgidis
Department of Oral and Maxillofacial Surgery, School of Dentistry,
Faculty of Health Sciences, Aristotle University, Thessaloniki, Greece

Author Benefits

High Visibility:

indexed within Scopus, ESCI (Web of Science), PubMed, PMC, Embase, and other databases.

Journal Rank:

JCR - Q2 (Medicine, General and Internal) / CiteScore - Q2 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 22.7 days after submission; acceptance to publication is undertaken in 3.8 days (median values for papers published in this journal in the first half of 2025).
