Special Issue

Digital Health and Virtual Care Innovations: Applications for Long-Term Care and Self-Management Support

Message from the Guest Editor

This Special Issue will highlight cutting-edge research and clinical innovations in digital health. With the global rise in chronic conditions and aging populations, there is an urgent need for scalable, patient-centered care solutions. This issue will focus on the integration of wearable sensors, mobile health applications, and virtual care models, including ones by nurses or implemented within nursing practice, to enhance long-term care delivery and self-management of chronic diseases. We welcome contributions that explore clinical trials, implementation studies, technology usability, nursing workflow integration, health equity considerations, and outcomes related to patient engagement, symptom monitoring, and quality of life. This Special Issue aims to advance the science and practice of digital nursing and healthcare by bridging interdisciplinary perspectives and promoting evidence-based, technology-enabled healthcare solutions.

About the Journal

Message from the Editor-in-Chief

Editor-in-Chief

Dr. Athanassios A. Kyrgidis
Department of Oral and Maxillofacial Surgery, School of Dentistry,
Faculty of Health Sciences, Aristotle University, Thessaloniki, Greece

Author Benefits

High Visibility:
indexed within Scopus, ESCI (Web of Science), PubMed, PMC, Embase, and other databases.

Journal Rank:
JCR - Q2 (Medicine, General and Internal) / CiteScore - Q2 (General Medicine)

Rapid Publication:
manuscripts are peer-reviewed and a first decision is provided to authors approximately 22.7 days after submission; acceptance to publication is undertaken in 3.8 days (median values for papers published in this journal in the first half of 2025).
