

## Special Issue

# Best Practices in Pain Medicine

### Message from the Guest Editor

Chronic pain is a pervasive public health emergency that affects over 25% of the population. In the wake of an ever-expanding treatment approach that incorporates both medication-based and minimally invasive procedures, our understanding of chronic pain ailments is progressively growing. This Special Issue will address new advances in the treatment and management of chronic pain conditions. Our aim is to highlight the cutting edge of treatment modalities and diagnostic interpretation.
