

Special Issue

Reproducibility in Sleep and Circadian Science

Message from the Guest Editor

We are pleased to announce the Special Issue “Reproducibility in sleep and circadian science”. The focus of this collection of articles is to bring open and reproducible science to the attention of sleep and circadian researchers. This Special Issue aims to provide a platform for discussing open science and reproducibility—including its challenges—with a specific focus on circadian and sleep research. In this Special Issue, original research articles and reviews are welcome. Research areas may include (but are not limited to) the following:

- Original research articles employing open and reproducible science principles, such as registered reports;
- Original meta-research articles on open and reproducible science practices in the field;
- Perspective pieces and opinions, as well as commentary and narratives;
- Articles describing software and resources to make research workflows reproducible;
- Reviews.

We are also interested in allowing you to open your file drawer, i.e., well-designed and adequately powered but failed experiments or studies that you have not published, and failed replications.

Guest Editor

Prof. Dr. Manuel Spitschan

1. Translational Sensory & Circadian Neuroscience, Max Planck Institute for Biological Cybernetics, Tübingen, Germany
2. Chronobiology & Health, TUM Department of Sport and Health Sciences (TUM SG), Technical University of Munich, Munich, Germany
3. TUM Institute for Advanced Study (TUM-IAS), Technical University of Munich, Garching, Germany

Deadline for manuscript submissions

closed (30 June 2023)

About the Journal

Message from the Editorial Board

Editors-in-Chief

Prof. Dr. Christian Cajochen

Psychiatric Hospital of the University of Basel, Centre for
Chronobiology, Wilhelm-Kleinstr. 27, CH-4002 Basel, Switzerland

Prof. Dr. Paul Franken

Center for Integrative Genomics, University of Lausanne, 1015
Lausanne, Switzerland

Author Benefits

High visibility:

indexed within Scopus, ESCI (Web of Science), PubMed,
PMC, FSTA, and other databases.

Journal Rank:

CiteScore - Q2 (Neuroscience (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is
provided to authors approximately 37 days after
submission; acceptance to publication is undertaken in 4.7
days (median values for papers published in this journal in
the first half of 2025).
