

## Special Issue

# Corrosion and Corrosion Protection Strategies in the Marine Environment

### Message from the Guest Editors

Saltwater covers more than 70% of the Earth's surface (approximately 1,335,000,000 cubic kilometers) and is generally considered the most corrosive of all natural environments. Therefore, marine environments pose a major challenge to metallic materials due to a variety of factors such as high salinity, water velocity, temperature, and biological activity. In addition, human and industrial activities lead to climate change and pollution of seawater, which further increases the aggressiveness of the marine environment. Corrosion is a major cause of deterioration in marine and offshore structures which results in structural failure, leakage, product loss, environmental pollution, and even the loss of human life. Therefore, this Special Issue is focused on gathering a list of scientific papers on the topic of corrosion in the marine environment, the influence of climate change and pollution on marine corrosion, development and characterization of advanced high-resistance materials, and the application of different methods for corrosion protection in harsh marine corrosion environments.

### Guest Editors

Prof. Dr. Ladislav Vrsalović

Department of Electrochemistry and Materials Protection, Faculty of Chemistry and Technology, University of Split, Ruđera Boškovića 35, 21000 Split, Croatia

Prof. Dr. Philippe Refait

Laboratory of Engineering Sciences for the Environment (LaSIE), Université de La Rochelle, La Rochelle, France

### Deadline for manuscript submissions

28 February 2026

## About the Journal

### Message from the Editor-in-Chief

---

#### Editor-in-Chief

Prof. Dr. Raman Singh  
Departments of Mechanical & Aerospace Engineering and Chemical  
Engineering, Monash University, Melbourne, VIC 3800, Australia

---

#### Author Benefits

##### High Visibility:

indexed within ESCI (Web of Science), Scopus, EBSCO,  
and other databases.

##### Rapid Publication:

manuscripts are peer-reviewed and a first decision is  
provided to authors approximately 21.7 days after  
submission; acceptance to publication is undertaken in 4.6  
days (median values for papers published in this journal in  
the first half of 2025).

##### Journal Rank:

CiteScore - Q2 (Materials Science (miscellaneous))
