

## Advances in Wear-Resistant Coatings

Guest Editors:

**Dr. Hui Liang**

School of Physics and Electronic  
Technology, Liaoning Normal  
University, Dalian, China

**Prof. Dr. Zhiqiang Cao**

School of Materials Science and  
Engineering, Dalian University of  
Technology, Dalian, China

Deadline for manuscript  
submissions:

**30 May 2024**

### Message from the Guest Editors

Wear-resistant coatings have advantages over low friction coefficients, large load-bearing capacities, wide temperature ranges, etc. Coating preparation technology has also reached a new level. Exploring new coating materials has facilitated the discovery of multifunctional coatings for applications in aerospace, civil machinery, and other fields.

The scope of this Special Issue will include, but is not limited to, the following fundamental and applied research topics:

- Research developments in new organic, inorganic, and composite coatings;
- Coating technology and processes: sol-gel, hydrothermal, laser, plasma, thermal spray, electroplating, chemical deposition, physical vapor deposition, chemical vapor deposition, chromating, fluorozirconating, fluorotitanating, phosphating, bluing, black oxide coating formation, anodizing, etc.;
- Dry-wear-resistant coatings;
- High-temperature wear-resistant coatings;
- Wear-corrosion-resistant coatings;
- Test methods for determining the wear-resistant levels of coatings in various environments;
- The modeling and simulation of coating processing and wear;
- Nanostructured composite coatings and wear characterization.

## Editors-in-Chief

### **Prof. Dr. Wei Pan**

State Key Laboratory of New  
Ceramics and Fine Processing,  
School of Materials Science &  
Engineering, Tsinghua University,  
Beijing 100084, China

### **Dr. Emerson Coy**

NanoBioMedical Centre, Adam  
Mickiewicz University in Poznań,  
ul. Wszechnicy Piastowskiej 3, 61-  
614 Poznań, Poland

## Message from the Editorial Board

Now more than ever, research is called for to produce technologies and improve knowledge to solve the major challenges faced by our society. The development of new materials and devices for (without the ambition to be exhaustive) energy, health and food technology, together with the need for establishing processes that reduce the impact on critical resources and the environment, is indeed at the center of most contemporary research. Surface science and engineering play a key role in this regard. Refining surfaces and their modifications provides new materials, architectures and processes with a huge potential to aid most societal challenges. *Coatings* is a well-established, peer-reviewed, online journal that focuses on the dissemination of publications in the field of surface science and engineering. *Coatings* publishes original research articles that report cutting-edge results and review papers on the hottest topics.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Inspec, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q2 (*Materials Science, Coatings & Films*) / CiteScore - Q2 (*Surfaces and Interfaces*)
