an Open Access Journal by MDPI

Recent Advances in Hydrophobic Coatings

Guest Editor:

Dr. Atif Hussain

Department of Materials Engineering, Composites Research Network, The University of British Columbia, Vancouver, BC, Canada

Deadline for manuscript submissions:

closed (30 November 2022)

Message from the Guest Editor

Dear Colleagues,

Surface functionalization through the deposition of coatings can have beneficial impacts on the substrate. Providing hydrophobicity to materials can widen their scope in numerous applications and improve their compatibility with polymers for developing strong durable composites. Hydrophobic coatings have been successfully fabricated using various approaches and have substantially improved substrate performance. This issue welcomes research on waterproof coatings prepared by different processes and their deposition on a variety of substrates, such as bio-based materials, cellulose, ceramics, and metals.

The scope of this Special Issue will serve as a forum for papers based on, but not limited to, the following topics:

- Experimental research on hydrophobic, waterproof and water-resistant coatings.
- Recent advancements in multi-functional organic, inorganic, hybrid and self-cleaning coatings
- Coatings produced by different processes, including, but not limited, to sol-gel, plasma processing, CVD, and in situ additive manufacturing.
- Understanding coating durability and degradation through friction, wear, weathering UV, corrosion, etc.

Specialsue

Editors-in-Chief

Prof. Dr. Wei Pan

State Key Laboratory of New Ceramics and Fine Processing, School of Materials Science & Engineering, Tsinghua University, Beijing 100084, China

Dr. Emerson Coy

NanoBioMedical Centre, Adam Mickiewicz University in Poznań, ul. Wszechnicy Piastowskiej 3, 61-614 Poznań, Poland

Message from the Editorial Board

Now more than ever, research is called for to produce technologies and improve knowledge to solve the major challenges faced by our society. The development of new materials and devices for (without the ambition to be exhaustive) energy, health and food technology, together with the need for establishing processes that reduce the impact on critical resources and the environment, is indeed at the center of most contemporary research. Surface science and engineering play a key role in this regard. Refining surfaces and their modifications provides new materials, architectures and processes with a huge potential to aid most societal challenges. Coatings is a well-established, peer-reviewed, online journal that focuses on the dissemination of publications in the field of surface science and engineering. Coatings publishes original research articles that report cutting-edge results and review papers on the hottest topics.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Materials Science, Coatings & Films*) / CiteScore - Q2 (*Surfaces and Interfaces*)
