# **Environmentally-Friendly Coatings towards Biofouling Control and Microbiologically Influenced Corrosion (MIC) Inhibition**

Guest Editors:

#### Dr. Elisabete Ribeiro Silva

1. BioISI - Biosystems & Integrative Sciences Institute, Faculdade de Ciências, Universidade de Lisboa, Campo Grande, 1749-016 Lisboa, Portugal

2. Departamento de Química e Bioquímica, Faculdade de Ciências, Universidade de Lisboa, Campo Grande, 1749-016 Lisboa, Portugal

#### Dr. Guangming Jiang

School of Civil, Mining and Environmental Engineering, University of Wollongong, Wollongong, NSW 2522, Australia

Deadline for manuscript submissions:

20 April 2025

## **Message from the Guest Editors**

Dear Colleague,

This Special Issue of *Coatings*, "Environmentally Friendly Marine Coatings for biofouling control and Microbiologically Influenced Corrosion Inhibition", will cover the most recent and promising advances in research surrounding marine coatings for the control of biofouling and for inhibiting microbiologically influenced corrosion.

The main topics that this Special Issue of *Coatings* will cover include the following:

- Foul-releasing coatings;
- Antifouling self-healing coatings;
- Non-releasing biocidal coatings;
- Bio-passive-based polymeric coatings (zwitterionic, self-assembled monolayer approaches);
- Bioinspired coatings (incorporating natural and/or new synthesized biomimetic based agents, microtopographically modified coatings);
- Hybrid and/or multifunctional coatings (amphiphilic/stimuli-responsive systems);
- Sewer concrete coatings.

## **Editors-in-Chief**

#### Prof. Dr. Wei Pan

State Key Laboratory of New Ceramics and Fine Processing, School of Materials Science & Engineering, Tsinghua University, Beijing 100084, China

## **Dr. Emerson Coy**

NanoBioMedical Centre, Adam Mickiewicz University in Poznań, ul. Wszechnicy Piastowskiej 3, 61-614 Poznań, Poland

# **Message from the Editorial Board**

Now more than ever, research is asked to deliver knowledge and technologies to solve the major challenges faced by our society. The development of new materials and devices for (without the ambition to be exhaustive) energy, health and food technology, together with the need for establishing processes that reduce the impact on critical resources and the environment, is indeed in the spotlight of most contemporary research. Surface science and engineering play a key role in this regard, with an incredible potential in delivering new and deep scientific understanding and technical solutions essential to solve most of the major societal challenges.

Coatings is a well-established, peerreviewed, online journal dedicated to the vibrant field of surface science and engineering. Coatings publishes original research articles that report cutting-edge results and review papers that make the point on the hottest research topics.

### **Author Benefits**

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Inspec, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q2 (*Physics, Applied*) / CiteScore - Q2 (*Surfaces, Coatings and Films*)
