

## Micro- and Nanoscale Coatings for Biomedical and Environmental Applications

Guest Editors:

**Dr. Abu ul Hassan S. Rana**

Department of Electrical and  
Electronic Engineering, The  
University of Melbourne,  
Parkville, VIC 3010, Australia

**Dr. C. Justin Raj**

Physics Division, School of  
Advanced Sciences, Vellore  
Institute of Technology (VIT),  
Chennai Campus, Chennai 600  
127, Tamilnadu, India

**Dr. Shoyebmohamad F.  
Shaikh**

Department of Chemistry,  
College of Sciences, King Saud  
University, Riyadh 11451, Saudi  
Arabia

Deadline for manuscript  
submissions:

**closed (20 June 2023)**

### Message from the Guest Editors

Dear Colleagues,

This Special Issue focuses on publishing research on the development of novel micro/nanoscale devices fabricated via the aforementioned coating methods. We invite potential authors to submit their novel research ideas in the form of articles, short communications and review papers. The scope of this Special Issue will serve as a platform for papers on the following concepts:

- The experimental processing of new methods of nanomaterial coatings.
- The advent of new advanced functional nanomaterials and their fabrication and characterization in optoelectronics.
- Nanoscale coatings for novel biomedical devices to diagnose multiple chronic diseases.
- Nanoscale coatings of novel devices for environmental monitoring such as gas sensors, e-nose systems and optical cameras.
- Computer-aided simulations and the modelling of multiple coatings for biomedical and environmental applications.

We are looking forward to receiving your submissions.

## Editors-in-Chief

### **Prof. Dr. Wei Pan**

State Key Laboratory of New  
Ceramics and Fine Processing,  
School of Materials Science &  
Engineering, Tsinghua University,  
Beijing 100084, China

### **Dr. Emerson Coy**

NanoBioMedical Centre, Adam  
Mickiewicz University in Poznań,  
ul. Wszechnicy Piastowskiej 3, 61-  
614 Poznań, Poland

## Message from the Editorial Board

Now more than ever, research is called for to produce technologies and improve knowledge to solve the major challenges faced by our society. The development of new materials and devices for (without the ambition to be exhaustive) energy, health and food technology, together with the need for establishing processes that reduce the impact on critical resources and the environment, is indeed at the center of most contemporary research. Surface science and engineering play a key role in this regard. Refining surfaces and their modifications provides new materials, architectures and processes with a huge potential to aid most societal challenges. *Coatings* is a well-established, peer-reviewed, online journal that focuses on the dissemination of publications in the field of surface science and engineering. *Coatings* publishes original research articles that report cutting-edge results and review papers on the hottest topics.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Inspec, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q2 (*Materials Science, Coatings & Films*) / CiteScore - Q2 (*Surfaces and Interfaces*)
