Electronics, Masaryk University,  
Brno, Czech Republic

Deadline for manuscript  
submissions:

**closed (31 October 2018)**

### Message from the Guest Editor

Dear Colleagues,

Atomic Layer Deposition (ALD) has developed from its early beginnings in the Soviet Union and Finland into a process that is critical for microelectronics manufacturing and also extends into many other areas, for example, flexible electronics, displays, anti-corrosion layers, catalysis and pharmaceuticals. This Special Issue of *Coatings* on “Atomic Layer Deposition” is intended to cover original research and critical review articles on recent advances in all aspects of ALD.

In particular, the topics of interest include, but are not limited to:

- ALD processes for materials and devices;
- Characterization of ALD coatings;
- ALD nucleation, growth phenomena and process modelling;
- Applications of ALD;
- Spatial and roll-to-roll ALD processes.

Prof. Dr. David Cameron

*Guest Editor*

## Editors-in-Chief

### Prof. Dr. Wei Pan

State Key Laboratory of New  
Ceramics and Fine Processing,  
School of Materials Science &  
Engineering, Tsinghua University,  
Beijing 100084, China

### Dr. Emerson Coy

NanoBioMedical Centre, Adam  
Mickiewicz University in Poznań,  
ul. Wszechnicy Piastowskiej 3, 61-  
614 Poznań, Poland

## Message from the Editorial Board

Now more than ever, research is asked to deliver knowledge and technologies to solve the major challenges faced by our society. The development of new materials and devices for (without the ambition to be exhaustive) energy, health and food technology, together with the need for establishing processes that reduce the impact on critical resources and the environment, is indeed in the spotlight of most contemporary research. Surface science and engineering play a key role in this regard, with an incredible potential in delivering new and deep scientific understanding and technical solutions essential to solve most of the major societal challenges.

Coatings is a well-established, peerreviewed, online journal dedicated to the vibrant field of surface science and engineering. Coatings publishes original research articles that report cutting-edge results and review papers that make the point on the hottest research topics.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Ei Compendex, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q2 (Physics, Applied) / CiteScore - Q2 (Surfaces, Coatings and Films)
