Message from the Guest Editors

Dear Colleagues,

For this Special Issue, we are inviting papers in the general field of EPD as a processing technique for the development of inorganic, organic, and hybrid coatings. Topics of interest for this Special Issue include, but are not limited to:

- Novel experimental setups for EPD
- Substrate surface treatments and coatings by EPD
- Colloidal chemistry knowledge in EPD
- Microstructure design tools applied to EPD coatings
- Nanostructured coatings by EPD
- EPD for corrosion or oxidation protective coatings
- EPD coatings in biofunctionalization of surfaces
- EPD coatings in energy storage and generation devices
- EPD coatings in optoelectronic and magnetic devices and sensors
- EPD in additive manufacturing of patterns

Prof. Dr. Aldo R. Boccaccini

Prof. Dr. Begoña Ferrari

Prof. Dr. Laxmidhar Besra

Message from the Editor-in-Chief

Now more than ever, research is called for to produce technologies and improve knowledge to solve the major challenges faced by our society. The development of new materials and devices for (without the ambition to be exhaustive) energy, health and food technology, together with the need for establishing processes that reduce the impact on critical resources and the environment, is indeed at the center of most contemporary research. Surface science and engineering play a key role in this regard. Refining surfaces and their modifications provides new materials, architectures and processes with a huge potential to aid most societal challenges. *Coatings* is a well-established, peer-reviewed, online journal that focuses on the dissemination of publications in the field of surface science and engineering. *Coatings* publishes original research articles that report cutting-edge results and review papers on the hottest topics.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High visibility: indexed by the Science Citation Index Expanded (Web of Science), Scopus and Inspec (IET).

Rapid publication: manuscripts are peer-reviewed and a first decision provided to authors approximately 13.1 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the first half of 2019).
