Deadline for manuscript submissions:

**closed (20 September 2023)**

### Message from the Guest Editor

Dear Colleagues,

Carbon materials are attracting tremendous research interest because of their extraordinary properties and unparalleled advantages. The applications of the carbon materials strongly depend on not only their intrinsic structural features, but also their interfacial affinity with other substrates. In this regard, modification toward the structure and surface of carbon materials as well as interface with applied substrates is crucial for their valued applications. For this reason, we would like to assemble a Special Issue titled “Graphite/Carbon: Surface Modification and Applications”.

The topics of interest for this Special Issue include (but are not restricted to):

- Novel surface modification technologies for carbon materials;
- Functionalized modification and applications of graphite, graphene, and their derivatives;
- Characterization and analysis of carbon materials;
- Novel carbon materials: structure and properties;
- Carbon-based coatings;
- Carbon films;
- Carbon-carbon composites;
- Applications based on carbon materials.

We look forward to receiving your contributions.

Dr. Can Jiang

## Editors-in-Chief

### Prof. Dr. Wei Pan

State Key Laboratory of New  
Ceramics and Fine Processing,  
School of Materials Science &  
Engineering, Tsinghua University,  
Beijing 100084, China

### Dr. Emerson Coy

NanoBioMedical Centre, Adam  
Mickiewicz University in Poznań,  
ul. Wszechnicy Piastowskiej 3, 61-  
614 Poznań, Poland

## Message from the Editorial Board

Now more than ever, research is asked to deliver knowledge and technologies to solve the major challenges faced by our society. The development of new materials and devices for (without the ambition to be exhaustive) energy, health and food technology, together with the need for establishing processes that reduce the impact on critical resources and the environment, is indeed in the spotlight of most contemporary research. Surface science and engineering play a key role in this regard, with an incredible potential in delivering new and deep scientific understanding and technical solutions essential to solve most of the major societal challenges.

Coatings is a well-established, peerreviewed, online journal dedicated to the vibrant field of surface science and engineering. Coatings publishes original research articles that report cutting-edge results and review papers that make the point on the hottest research topics.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Inspec, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q2 (*Physics, Applied*) / CiteScore - Q2 (*Surfaces, Coatings and Films*)
