submissions:
closed (31 January 2022)

Message from the Guest Editors

Dear Colleagues,

The Special Issue on “Natural Materials in Functional Coatings” would like to inspire researchers all over the world to contribute with their most exciting results in the area of natural materials (extracts, essential oils, individual compounds isolated from natural sources) for the development of functional coatings. The term “functional coatings” will cover both their intrinsic functionality (such as, for example, superhydrophobicity, antimicrobial, antifouling, antireflective radar absorbing properties, and self-stratification, conductivity) and stimuli responsive functionality (such as thermochromic, color shifting, touch sensitive, corrosion- and explosive-resistant, self-healing, shape-memory materials, etc.).

Original research and review papers are welcomed in the following topics:

Natural materials in antimicrobial coatings;

Natural materials used in coatings for increasing the commercial products' shelf-life;

Natural materials for the development of protective coatings in cultural heritage applications;

Natural materials for other functional coatings.

Editors-in-Chief

Message from the Editorial Board

Now more than ever, research is called for to produce technologies and improve knowledge to solve the major challenges faced by our society. The development of new materials and devices for (without the ambition to be exhaustive) energy, health and food technology, together with the need for establishing processes that reduce the impact on critical resources and the environment, is indeed at the center of most contemporary research. Surface science and engineering play a key role in this regard. Refining surfaces and their modifications provides new materials, architectures and processes with a huge potential to aid most societal challenges. *Coatings* is a well-established, peer-reviewed, online journal that focuses on the dissemination of publications in the field of surface science and engineering. *Coatings* publishes original research articles that report cutting-edge results and review papers on the hottest topics.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Materials Science, Coatings & Films*) / CiteScore - Q2 (*Surfaces and Interfaces*)
