

Biological Colonization of Cultural Heritage. Emerging Trends in the Protection of Cultural Properties—Novel Control Strategies and Preventive Approaches

Guest Editors:

Dr. Daniela Pinna

Department of Chemistry
"Giacomo Ciamician", Alma
Mater Studiorum Università di
Bologna, 40126 Bologna, Italy

Prof. Dr. Beata Gutarowska

Institute of Fermentation
Technology and Microbiology,
Faculty of Biotechnology and
Food Sciences, Lodz University of
Technology, Wolczanska
171/173, 90-924 Lodz, Poland

Deadline for manuscript
submissions:

closed (31 December 2023)

Message from the Guest Editors

Dear Colleagues,

The durability of the world's cultural heritage depends on many factors, mostly related to the surrounding environment with threats frequently coming from climatic conditions, climate change, air pollution, and biological colonization.

This Special Issue aims to publish outstanding papers on novel advances in products, methods, and techniques for the prevention and control of organisms involved in the biodeterioration of cultural heritage. The application of ecofriendly processes that do not require the use of harmful materials has recently received growing consideration. The evaluation of their effectiveness, environmental impact, long-term effect, and harmlessness toward substrates have been the topics of many recent studies. Toxicity and environmental impact are important causes for concern today in the selection of products such as biocides. This Issue will also focus on analytical techniques suitable to assess the efficacy of control methods. Several diagnostic tools have been developed for in situ monitoring of the performance of methods and products and for the detection of possible risks, thus facilitating maintenance and management decisions.

Special Issue

Editors-in-Chief

Prof. Dr. Wei Pan

State Key Laboratory of New
Ceramics and Fine Processing,
School of Materials Science &
Engineering, Tsinghua University,
Beijing 100084, China

Dr. Emerson Coy

NanoBioMedical Centre, Adam
Mickiewicz University in Poznań,
ul. Wszechnicy Piastowskiej 3, 61-
614 Poznań, Poland

Message from the Editorial Board

Now more than ever, research is called for to produce technologies and improve knowledge to solve the major challenges faced by our society. The development of new materials and devices for (without the ambition to be exhaustive) energy, health and food technology, together with the need for establishing processes that reduce the impact on critical resources and the environment, is indeed at the center of most contemporary research. Surface science and engineering play a key role in this regard. Refining surfaces and their modifications provides new materials, architectures and processes with a huge potential to aid most societal challenges. *Coatings* is a well-established, peer-reviewed, online journal that focuses on the dissemination of publications in the field of surface science and engineering. *Coatings* publishes original research articles that report cutting-edge results and review papers on the hottest topics.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Materials Science, Coatings & Films*) / CiteScore - Q2 (*Surfaces and Interfaces*)
