Deadline for manuscript
submissions:

closed (31 August 2018)

Message from the Guest Editor

Dear Colleagues,

Thin films is an important field in materials science, electrical engineering, and applied solid-state physics. Advances in thin films during this century have enabled a wide range of technological breakthroughs in the fields of surface engineering, corrosion, energy generation and storage, microelectronics, computer manufacturing, and physical devices.

This Special Issue invites manuscripts on the synthesis, fabrication, processing, characterization, properties, and applications of thin films.

In particular, the topics of interest include, but are not limited to:

- Synthesis and Fabrication
- Characterization and Applications
- Surfaces and Interfaces
- Nanomechanics of thin films
- Properties of thin films
- Thin film devices

Message from the Editor-in-Chief

Now more than ever, research is called for to produce technologies and improve knowledge to solve the major challenges faced by our society. The development of new materials and devices for (without the ambition to be exhaustive) energy, health and food technology, together with the need for establishing processes that reduce the impact on critical resources and the environment, is indeed at the center of most contemporary research. Surface science and engineering play a key role in this regard. Refining surfaces and their modifications provides new materials, architectures and processes with a huge potential to aid most societal challenges. *Coatings* is a well-established, peer-reviewed, online journal that focuses on the dissemination of publications in the field of surface science and engineering. *Coatings* publishes original research articles that report cutting-edge results and review papers on the hottest topics.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High visibility: indexed by the Science Citation Index Expanded (Web of Science), Scopus and Inspec (IET).

Rapid publication: manuscripts are peer-reviewed and a first decision provided to authors approximately 13.1 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the first half of 2019).
