### Message from the Guest Editor

Dear Colleagues,

This Special Issue will highlight progress in the growth of transparent conducting oxides (TCOs) thin films and multilayers, as well as the understanding of the interplay between their structural, transport, and optical properties at a fundamental level. These materials have become ubiquitous in key modern technologies such as optoelectronics, photovoltaic cells, smart windows, light-emitting devices, photonics, all with a strong impact on the development of society.

The topics of interest for this Special Issue include, but are not limited to, the following research domains:

- New TCO materials, thin films, and multilayers.
- Non-stoichiometric TCOs.
- Surface and interface engineering.
- Conduction mechanisms.
- Optical absorption/emission processes.
- Insulator–metal transitions and correlated metallic state.
- Electron correlations in highly doped TCOs, plasmonic effects.
- $p$ -type TCOs, such as delafossite oxides and oxychalcogenides.
- TCOs for low-loss metamaterials.
- High figure of merit  $p$ -type TCOs.
- Materials design by computational methods and machine learning.

## Editors-in-Chief

### Prof. Dr. Wei Pan

State Key Laboratory of New  
Ceramics and Fine Processing,  
School of Materials Science &  
Engineering, Tsinghua University,  
Beijing 100084, China

### Dr. Emerson Coy

NanoBioMedical Centre, Adam  
Mickiewicz University in Poznań,  
ul. Wszechnicy Piastowskiej 3, 61-  
614 Poznań, Poland

## Message from the Editorial Board

Now more than ever, research is asked to deliver knowledge and technologies to solve the major challenges faced by our society. The development of new materials and devices for (without the ambition to be exhaustive) energy, health and food technology, together with the need for establishing processes that reduce the impact on critical resources and the environment, is indeed in the spotlight of most contemporary research. Surface science and engineering play a key role in this regard, with an incredible potential in delivering new and deep scientific understanding and technical solutions essential to solve most of the major societal challenges.

Coatings is a well-established, peerreviewed, online journal dedicated to the vibrant field of surface science and engineering. Coatings publishes original research articles that report cutting-edge results and review papers that make the point on the hottest research topics.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Inspec, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q2 (*Physics, Applied*) / CiteScore - Q2 (*Surfaces, Coatings and Films*)
