

Special Issue

Advanced Coatings for Metals

Message from the Guest Editors

Coatings on materials are typically developed to improve their surface or interface properties under the service environment. Coatings could prolong the lifetime of metals in various applications by serving as physical protection layers or smart layers providing unprecedented functionality and opportunities for metallic substrates. However, in some specific environments, challenges, still remain to improve the corrosion resistance of materials and the controllability of biomaterials. Therefore, it is highly desirable to design and develop novel coatings with high environmental compatibility, low cost, and long-term durability towards excellent performance according to their application background. Towards this goal, we are assembling the Special Issue to encourage researchers to publish original articles, reviews, and short communication in this field. The topics of interest for this Special Issue include (but are not restricted to):

- Novel coating design;
- Corrosion/degradation mechanisms of metallic materials;
- Novel eco-friendly coatings;
- Surface treatment and functionality;
- Bioactive coatings for metallic biomaterials.

About the Journal

Message from the Editorial Board

Now more than ever, research is asked to deliver knowledge and technologies to solve the major challenges faced by our society. The development of new materials and devices for (without the ambition to be exhaustive) energy, health and food technology, together with the need for establishing processes that reduce the impact on critical resources and the environment, is indeed in the spotlight of most contemporary research. Surface science and engineering play a key role in this regard, with an incredible potential in delivering new and deep scientific understanding and technical solutions essential to solve most of the major societal challenges.

Coatings is a well-established, peerreviewed, online journal dedicated to the vibrant field of surface science and engineering. Coatings publishes original research articles that report cutting-edge results and review papers that make the point on the hottest research topics.

Editors-in-Chief

Prof. Dr. Wei Pan

State Key Laboratory of New Ceramics and Fine Processing, School of Materials Science & Engineering, Tsinghua University, Beijing 100084, China

Dr. Emerson Coy

NanoBioMedical Centre, Adam Mickiewicz University in Poznań, ul. Wszechnicy Piastowskiej 3, 61-614 Poznań, Poland

Author Benefits

Open Access

— free for readers, with article processing charges (APC) paid by authors or their institutions.
