

Special Issue

Advanced Coating Materials for Machining Processes

Message from the Guest Editors

This Special Issue aims to provide a platform for both academic and industrial researchers to disseminate their original research and critical review articles on all aspects of advanced coating materials utilized for diverse machining operations. Papers reporting important findings, novel insights, or useful techniques within the scope of this Special Issue are all welcome. The topics of interest include but are not limited to:

- Fabrication and characterization of advanced coating materials;
- Evaluation of cutting performances of coated tools;
- Modeling and simulation of machining operations using coated tools;
- Machinability assessment of hard-to-cut materials;
- Thermal and frictional behaviors of coating materials;
- Wear modes and failure mechanisms of coated cutting tools;
- Quantification of coated tool wear in machining;
- Wear control strategies of coated cutting tools;
- Theoretical prediction of coated tool life;
- Machining quality and defects assessment when using coated tools.

Guest Editors

Dr. Jinyang Xu

School of Mechanical Engineering, Faculty of Intelligence Technology, Shanghai Institute of Technology, Shanghai, China

Prof. Dr. Mohamed El Mansori

Arts et Métiers Institute of Technology, MSMP, HESAM Université, F-51006 Châlons-en-Champagne, France

Deadline for manuscript submissions

closed (31 December 2021)

About the Journal

Message from the Editorial Board

Now more than ever, research is asked to deliver knowledge and technologies to solve the major challenges faced by our society. The development of new materials and devices for (without the ambition to be exhaustive) energy, health and food technology, together with the need for establishing processes that reduce the impact on critical resources and the environment, is indeed in the spotlight of most contemporary research. Surface science and engineering play a key role in this regard, with an incredible potential in delivering new and deep scientific understanding and technical solutions essential to solve most of the major societal challenges.

Coatings is a well-established, peerreviewed, online journal dedicated to the vibrant field of surface science and engineering. Coatings publishes original research articles that report cutting-edge results and review papers that make the point on the hottest research topics.

Editors-in-Chief

Prof. Dr. Wei Pan

State Key Laboratory of New Ceramics and Fine Processing, School of Materials Science & Engineering, Tsinghua University, Beijing 100084, China

Dr. Emerson Coy

NanoBioMedical Centre, Adam Mickiewicz University in Poznań, ul. Wszechnicy Piastowskiej 3, 61-614 Poznań, Poland
