

Special Issue

Surface Treatment of Biomedical Polymer Scaffolds

Message from the Guest Editors

Biomedical materials have gradually become a necessary solution for the treatment of many clinical diseases. In order to enhance the biocompatibility of biomaterials and achieve better biological function, it is very important to improve the structure, composition and properties of the bio-scaffolds' surface. Therefore, we would like to invite you to submit your original research to this Coatings Special Issue entitled "Surface Treatment of Biomedical Polymer Scaffolds".

We encourage you to send manuscripts containing scientific findings within the broad field of biomedical materials. The topics of interest for this Special Issue, in particular, include (but are not restricted to):

Tissue engineering scaffolds;
Biomedical polymer materials;
Surface modification;
Surface chemical grafting;
Biomimetic construction;
Gradient structure biomaterials;
Surface antibacterial materials;
Surface anticoagulant materials;
Surface functionalization;
Surface biocompatibility.

About the Journal

Message from the Editorial Board

Now more than ever, research is asked to deliver knowledge and technologies to solve the major challenges faced by our society. The development of new materials and devices for (without the ambition to be exhaustive) energy, health and food technology, together with the need for establishing processes that reduce the impact on critical resources and the environment, is indeed in the spotlight of most contemporary research. Surface science and engineering play a key role in this regard, with an incredible potential in delivering new and deep scientific understanding and technical solutions essential to solve most of the major societal challenges.

Coatings is a well-established, peerreviewed, online journal dedicated to the vibrant field of surface science and engineering. Coatings publishes original research articles that report cutting-edge results and review papers that make the point on the hottest research topics.

Editors-in-Chief

Prof. Dr. Wei Pan

State Key Laboratory of New Ceramics and Fine Processing, School of Materials Science & Engineering, Tsinghua University, Beijing 100084, China

Dr. Emerson Coy

NanoBioMedical Centre, Adam Mickiewicz University in Poznań, ul. Wszechnicy Piastowskiej 3, 61-614 Poznań, Poland

Author Benefits

Open Access

— free for readers, with article processing charges (APC) paid by authors or their institutions.
