

Special Issue

Chemical Vapor Deposition (CVD) Coatings

Message from the Guest Editors

This Special Issue is dealing with deposition, fundamentals, characterization, and advanced surface engineering of materials and structures grown by different CVD deposition techniques, including but not limited to CVD, LPCVD, MTCVD, MOCVD, ALD, aerosol-assisted CVD, pulsed CVD, and their plasma-assisted counterparts, such as PECVD. The topic of interest includes but is not limited to:

- Deposition of hard and wear resistant coatings, such as Ti(C,N), TiN, α -Al₂O₃ β -Al₂O₃ and other conventional tool coatings;
- Processing, deposition, and structure development of CVD c-TiAlN coatings;
- Processing, deposition and structure development of CVD nanocomposite coatings such as TiSiN and TiSiCN;
- Processing, deposition and structure development of superhard CVD coatings such as coatings of diamond, amorphous carbon, c-BN and metal borides;
- Coatings to resist high temperature oxidization and corrosion;
- Tool coatings: modification of microstructure, texture, stress state, and thermal properties;
- Thermal barrier coatings and diffusion barrier coatings;
- Self-lubricating coating;
- Microstructural characterization of CVD coatings.

Guest Editors

Dr. Sakari Roppi

SAR Consulting, 8600-780 Lagos, Portugal

Dr. Ingolf Endler

Group manager at the Fraunhofer-Institute for Ceramic Technologies and Systems IKTS Dresden from 2000 to 2016, Germany

Dr. Mandy Höhn

Fraunhofer Institute for Ceramic Technologies and Systems IKTS, Dresden, Germany

Deadline for manuscript submissions

closed (30 June 2022)

About the Journal

Message from the Editor-in-Chief

Now more than ever, research is asked to deliver knowledge and technologies to solve the major challenges faced by our society. The development of new materials and devices for (without the ambition to be exhaustive) energy, health and food technology, together with the need for establishing processes that reduce the impact on critical resources and the environment, is indeed in the spotlight of most contemporary research. Surface science and engineering play a key role in this regard, with an incredible potential in delivering new and deep scientific understanding and technical solutions essential to solve most of the major societal challenges.

Coatings is a well-established, peerreviewed, online journal dedicated to the vibrant field of surface science and engineering. Coatings publishes original research articles that report cutting-edge results and review papers that make the point on the hottest research topics.

Editors-in-Chief

Prof. Dr. Wei Pan

State Key Laboratory of New Ceramics and Fine Processing, School of Materials Science & Engineering, Tsinghua University, Beijing 100084, China

Dr. Emerson Coy

NanoBioMedical Centre, Adam Mickiewicz University in Poznań, ul. Wszechnicy Piastowskiej 3, 61-614 Poznań, Poland
