

Special Issue

Coatings: Status, State of the Art Manufacture, Applications and Future Trends

Message from the Guest Editors

Over the years, industry and medical use of coatings has grown exponentially. This growth has been accompanied by an increase in the complexity and variety of the coatings, to meet diverse demands.

Different manufacturing techniques and processes have been developed to produce coatings of a varied nature to meet the requirements of the gamut of operating regimes, such as ceramic coatings, to provide thermal protection in automotive components. The high-temperature operating regime of the reciprocating engine, a result of the protection of its metal components by the ceramic coatings, enables efficient operation of the vehicle and leads to a reduction in emissions. This Issue seeks papers including, but not limited to, studies on the following coatings: ceramic coatings, thermal barrier coatings, solid lubricant coatings and diamond-like carbon coatings, discussed under one, or a combination, of the following headings:

- Status
- State-of-the-Art Manufacturing Techniques
- Applications
- Future trends
- Theoretical Modelling and Prediction of Coatings Failure/Reliability and Experimental Validation Methods

About the Journal

Message from the Editorial Board

Now more than ever, research is asked to deliver knowledge and technologies to solve the major challenges faced by our society. The development of new materials and devices for (without the ambition to be exhaustive) energy, health and food technology, together with the need for establishing processes that reduce the impact on critical resources and the environment, is indeed in the spotlight of most contemporary research. Surface science and engineering play a key role in this regard, with an incredible potential in delivering new and deep scientific understanding and technical solutions essential to solve most of the major societal challenges.

Coatings is a well-established, peerreviewed, online journal dedicated to the vibrant field of surface science and engineering. Coatings publishes original research articles that report cutting-edge results and review papers that make the point on the hottest research topics.

Editors-in-Chief

Prof. Dr. Wei Pan

State Key Laboratory of New Ceramics and Fine Processing, School of Materials Science & Engineering, Tsinghua University, Beijing 100084, China

Dr. Emerson Coy

NanoBioMedical Centre, Adam Mickiewicz University in Poznań, ul. Wszechnicy Piastowskiej 3, 61-614 Poznań, Poland
