

Special Issue

Surface and Interface Analysis of Cultural Heritage, 2nd Edition

Message from the Guest Editor

Surface and interface analysis are fundamental in cultural heritage (CH) to understand the mechanisms that underlie alterations and consequently to find the most suitable treatment to avoid them. The Special Issue will serve as a forum for papers in the following topics:

- Theoretical and experimental research, knowledge, and new ideas in CH surface and interface analysis to help us understand protective and preventive coating mechanisms.
- Recent developments in multi-functional organic, inorganic, and hybrid coatings.
- Experiments on coating performance with exposure to high temperatures, high stress, and other extreme environmental conditions.
- Understanding the degradation mechanisms of coatings through different spectroscopic techniques combined with mechanical tests.
- The latest advancements in test methods considering the interplay between mechanical and chemical interactions and the ability to predict performance and/or reliability.
- Innovative non-invasive techniques to investigate surface and interface characteristics.
- Computer modeling or simulations to predict coating properties, performance, durability, and reliability in service environments.

About the Journal

Message from the Editorial Board

Now more than ever, research is asked to deliver knowledge and technologies to solve the major challenges faced by our society. The development of new materials and devices for (without the ambition to be exhaustive) energy, health and food technology, together with the need for establishing processes that reduce the impact on critical resources and the environment, is indeed in the spotlight of most contemporary research. Surface science and engineering play a key role in this regard, with an incredible potential in delivering new and deep scientific understanding and technical solutions essential to solve most of the major societal challenges.

Coatings is a well-established, peerreviewed, online journal dedicated to the vibrant field of surface science and engineering. Coatings publishes original research articles that report cutting-edge results and review papers that make the point on the hottest research topics.

Editors-in-Chief

Prof. Dr. Wei Pan

State Key Laboratory of New Ceramics and Fine Processing, School of Materials Science & Engineering, Tsinghua University, Beijing 100084, China

Dr. Emerson Coy

NanoBioMedical Centre, Adam Mickiewicz University in Poznań, ul. Wszechnicy Piastowskiej 3, 61-614 Poznań, Poland

Author Benefits

Open Access

— free for readers, with article processing charges (APC) paid by authors or their institutions.
