

Special Issue

Advances in Diamond Materials and Films

Message from the Guest Editors

We would like to invite you to submit your work to this Special Issue on "Advances in Diamond Materials and Films". The synthesis, characterization, and processing of single-crystal diamonds, polycrystalline films, nanodiamond powders, and heterostructures with other advanced materials are topics of interest for the technical and review articles that will comprise this Special Issue. The aim of this Special Issue is to present the latest experimental and theoretical developments in the field through a combination of original research papers and review articles. In particular, the main topics of interest include but are not limited to the following:

- The fundamentals and new concepts of diamond hybrid materials;
- Novel synthesis methods for diamond and hybrid materials;
- Surface modeling and characterization methods for diamond hybrid materials;
- The applications of diamond hybrid materials.

Guest Editors

Prof. Dr. Hongdong Li

Dr. Nan Gao

About the Journal

Message from the Editorial Board

Now more than ever, research is asked to deliver knowledge and technologies to solve the major challenges faced by our society. The development of new materials and devices for (without the ambition to be exhaustive) energy, health and food technology, together with the need for establishing processes that reduce the impact on critical resources and the environment, is indeed in the spotlight of most contemporary research. Surface science and engineering play a key role in this regard, with an incredible potential in delivering new and deep scientific understanding and technical solutions essential to solve most of the major societal challenges.

Coatings is a well-established, peerreviewed, online journal dedicated to the vibrant field of surface science and engineering. Coatings publishes original research articles that report cutting-edge results and review papers that make the point on the hottest research topics.

Editors-in-Chief

Prof. Dr. Wei Pan

State Key Laboratory of New Ceramics and Fine Processing, School of Materials Science & Engineering, Tsinghua University, Beijing 100084, China

Dr. Emerson Coy

NanoBioMedical Centre, Adam Mickiewicz University in Poznań, ul. Wszechnicy Piastowskiej 3, 61-614 Poznań, Poland

Author Benefits

Open Access

– free for readers, with article processing charges (APC) paid by authors or their institutions.
