

# Special Issue

## Thin Films and Surface Optics

### Message from the Guest Editor

Technological progress in the manufacturing of high-accuracy nanometric thin film structures and nanotextured surfaces has led to their application in many fields of science and technology. The characterization of their optical properties and the design of thin film structures with the desired optical parameters has opened up new possibilities for the management of light in such structures and the development of new optical devices in various fields of optics. This Special Issue will be devoted to all kinds of optical characterizations and applications of such thin films and surfaces. The optics of such thin films and their structures have a wide range of applications, beginning from coatings up to

the creation of sophisticated optical elements for lasers, plasmonics, integrated optical circuits, optical nanosensors, and many other uses. The aim of this Special Issue is to present the latest experimental and theoretical studies in the field of thin films and surface optics as presented in original research papers and review articles.

## About the Journal

### Message from the Editorial Board

Now more than ever, research is asked to deliver knowledge and technologies to solve the major challenges faced by our society. The development of new materials and devices for (without the ambition to be exhaustive) energy, health and food technology, together with the need for establishing processes that reduce the impact on critical resources and the environment, is indeed in the spotlight of most contemporary research. Surface science and engineering play a key role in this regard, with an incredible potential in delivering new and deep scientific understanding and technical solutions essential to solve most of the major societal challenges.

Coatings is a well-established, peerreviewed, online journal dedicated to the vibrant field of surface science and engineering. Coatings publishes original research articles that report cutting-edge results and review papers that make the point on the hottest research topics.

### Editors-in-Chief

Prof. Dr. Wei Pan

State Key Laboratory of New Ceramics and Fine Processing, School of Materials Science & Engineering, Tsinghua University, Beijing 100084, China

Dr. Emerson Coy

NanoBioMedical Centre, Adam Mickiewicz University in Poznań, ul. Wszechnicy Piastowskiej 3, 61-614 Poznań, Poland

---

### Author Benefits

#### Open Access

– free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Physics, Applied) / CiteScore - Q2 (Surfaces, Coatings and Films)
