Advances in Functional Thin Films: Fabrication, Properties, and Applications

Message from the Guest Editor

The development of thin film science and technology has been widely used in various fields, including energy, optoelectronics, environmental protection, and biomedicine. These applications require very diverse physical, chemical, optoelectronic, mechanical, abrasion, and corrosion resistance properties, which can be achieved by coating functional films on the surface of the substrate. To meet a new application requirement of functional thin film, it is necessary to fully grasp the intrinsic properties of the materials, supplemented by appropriate film fabrication technology. Therefore, the fabrication, properties, and applications of functional thin films are closely related. We sincerely invited researchers in this field to submit relevant manuscripts to this Special Issue of the journal *Coatings*.

Guest Editor

Prof. Dr. Yu-Ching Huang

Department of Materials Engineering, Ming Chi University of Technology, New Taipei City, Taiwan

Deadline for manuscript submissions

About the Journal

Message from the Editorial Board

Now more than ever, research is asked to deliver knowledge and technologies to solve the major challenges faced by our society. The development of new materials and devices for (without the ambition to be exhaustive) energy, health and food technology, together with the need for establishing processes that reduce the impact on critical resources and the environment, is indeed in the spotlight of most contemporary research. Surface science and engineering play a key role in this regard, with an incredible potential in delivering new and deep scientific understanding and technical solutions essential to solve most of the major societal challenges.

Coatings is a well-established, peerreviewed, online journal dedicated to the vibrant field of surface science and engineering. Coatings publishes original research articles that report cutting-edge results and review papers that make the point on the hottest research topics.

Editors-in-Chief

Prof. Dr. Wei Pan

State Key Laboratory of New Ceramics and Fine Processing, School of Materials Science & Engineering, Tsinghua University, Beijing 100084, China

Dr. Emerson Coy

NanoBioMedical Centre, Adam Mickiewicz University in Poznań, ul. Wszechnicy Piastowskiej 3, 61-614 Poznań, Poland
