

Special Issue

Recent Advances in Metallic Thin Films and Current Applications

Message from the Guest Editor

There has been a steady increase in the technological and societal impact of metallic thin films on material-based design and related research. This Special Issue welcomes a wide range of contributions that involve the deposition, synthesis, and characterization of metallic (plasmonic and nonplasmonic) of thin films on rigid or flexible substrates and their applications in detection platforms/sensors, nanostructured/tri-dimensional devices, or advanced nanomaterials. The topics should be related (but are not limited) to the following:

Fabrication of metallic thin films using modern top-down/bottom-up approaches.

Flexible sensors based on metallic thin films: from advanced fabrication methods to real-life applications

Porous metallic thin films: theoretical and experimental aspects.

Highly ordered nanostructured surfaces based on metallic thin films.

Electrochemical and optical sensors based on noble metallic thin films.

Modeling and design of plasmonic thin films.

Guest Editor

Dr. Alia Colniță

About the Journal

Message from the Editorial Board

Now more than ever, research is asked to deliver knowledge and technologies to solve the major challenges faced by our society. The development of new materials and devices for (without the ambition to be exhaustive) energy, health and food technology, together with the need for establishing processes that reduce the impact on critical resources and the environment, is indeed in the spotlight of most contemporary research. Surface science and engineering play a key role in this regard, with an incredible potential in delivering new and deep scientific understanding and technical solutions essential to solve most of the major societal challenges.

Coatings is a well-established, peerreviewed, online journal dedicated to the vibrant field of surface science and engineering. Coatings publishes original research articles that report cutting-edge results and review papers that make the point on the hottest research topics.

Editors-in-Chief

Prof. Dr. Wei Pan

State Key Laboratory of New Ceramics and Fine Processing, School of Materials Science & Engineering, Tsinghua University, Beijing 100084, China

Dr. Emerson Coy

NanoBioMedical Centre, Adam Mickiewicz University in Poznań, ul. Wszechnicy Piastowskiej 3, 61-614 Poznań, Poland
