

Special Issue

Micro- and Nano-Coatings for Technological and Biomedical Applications

Message from the Guest Editors

Concerning the most recent advances in the study of micro- and nano-coatings for technological and biological applications, the Special Issue will be an interdisciplinary volume devoted to the engineering and fundamental aspects of coatings features. The Issue is open for all coatings elaboration procedures and research investigations about the structure, micro- and nano-mechanical properties, oxidation and wear resistance, thermal protection, corrosion, diffusion resistance, hydrophilic/hydrophobic balance, and so on. The different strategies and trends in coating development performance of nowadays are encouraged for presentation in this Issue, taking into account that, indeed, there is still a significant amount of research needed in order to enhance the available knowledge about the relationship between coatings properties and applications. The topics of interest are, but are not limited to, as follows:

- Passive micro-/nano-coatings on valve metals;
- Hybrid complex coating with bioactive components;
- Surface and interface engineering to improve the materials performance;
- The relationship between structure, properties, and materials applications.

Guest Editors

Prof. Dr. Ioana Demetrescu

Department of General Chemistry, Politehnica University of Bucharest, 011061 Bucharest, Romania

Prof. Dr. Andreea Cristiana Didilescu

Department of Embryology, Faculty of Dentistry, The "Carol Davila" University of Medicine and Pharmacy, 050474 Bucharest, Romania

Deadline for manuscript submissions

About the Journal

Message from the Editorial Board

Now more than ever, research is asked to deliver knowledge and technologies to solve the major challenges faced by our society. The development of new materials and devices for (without the ambition to be exhaustive) energy, health and food technology, together with the need for establishing processes that reduce the impact on critical resources and the environment, is indeed in the spotlight of most contemporary research. Surface science and engineering play a key role in this regard, with an incredible potential in delivering new and deep scientific understanding and technical solutions essential to solve most of the major societal challenges.

Coatings is a well-established, peerreviewed, online journal dedicated to the vibrant field of surface science and engineering. Coatings publishes original research articles that report cutting-edge results and review papers that make the point on the hottest research topics.

Editors-in-Chief

Prof. Dr. Wei Pan

State Key Laboratory of New Ceramics and Fine Processing, School of Materials Science & Engineering, Tsinghua University, Beijing 100084, China

Dr. Emerson Coy

NanoBioMedical Centre, Adam Mickiewicz University in Poznań, ul. Wszechnicy Piastowskiej 3, 61-614 Poznań, Poland
