

Special Issue

Modern Methods of Shaping the Structure and Properties of Coatings

Message from the Guest Editors

We are pleased to invite you to contribute to the Special Issue "Modern Methods of Shaping the Structure and Properties of Coatings". Constant striving to increase the energy efficiency of machines, devices and processes and reduce energy consumption and emissions leads to the development of new materials with enhanced mechanical properties. Surface treatment is one way to enhance the mechanical properties and wear characteristics of metals and their alloys. This Special Issue aims to cover broad aspects of science, technology, applications of surface treatment methods, as well as characterisation of surface layers. Original research articles and reviews are welcome. Potential topics may include (but are not limited to):

- Study on technologies of surface treatment.
- Designing and shaping the properties of surface layers.
- Study of tribological characteristics of surface layers.
- Characterisation of surface layers (microstructure and properties).
- Study of wear mechanisms of surface layers (abrasion, erosion, cavitation, etc.).

We look forward to receiving your contributions.

About the Journal

Message from the Editorial Board

Now more than ever, research is asked to deliver knowledge and technologies to solve the major challenges faced by our society. The development of new materials and devices for (without the ambition to be exhaustive) energy, health and food technology, together with the need for establishing processes that reduce the impact on critical resources and the environment, is indeed in the spotlight of most contemporary research. Surface science and engineering play a key role in this regard, with an incredible potential in delivering new and deep scientific understanding and technical solutions essential to solve most of the major societal challenges.

Coatings is a well-established, peerreviewed, online journal dedicated to the vibrant field of surface science and engineering. Coatings publishes original research articles that report cutting-edge results and review papers that make the point on the hottest research topics.

Editors-in-Chief

Prof. Dr. Wei Pan

State Key Laboratory of New Ceramics and Fine Processing, School of Materials Science & Engineering, Tsinghua University, Beijing 100084, China

Dr. Emerson Coy

NanoBioMedical Centre, Adam Mickiewicz University in Poznań, ul. Wszechnicy Piastowskiej 3, 61-614 Poznań, Poland
