

Special Issue

Surface/Interface Science of Advanced Energy Materials

Message from the Guest Editors

In recent years, energy and environmental issues have received increasing attention. For the sustainable development of humanity, many countries have successively formulated plans for carbon emission reduction. The development of new energy technologies provides possible solutions for the realization of these goals. The Special Issue is set up to share the new discoveries and developments of surface/interface science of advanced energy materials. Original research articles, communications, perspectives, and comprehensive review papers related to this topic are welcome. In particular, the topics of interest include, but are not limited to, the following:

- Solid oxide fuel cells;
- Solid oxide electrolyzers/electrolysis cells;
- Solar cells;
- Metal-ion batteries;
- Lithium-sulfur batteries;
- Metal air batteries (Li-air, Mg-air, Al-air and Zn-air batteries);
- Cathode/anode electrode material;
- Electrolyte material.

Guest Editors

Prof. Dr. Shengli Pang

School of Materials Science and Engineering, Jiangsu University,
Zhenjiang 212013, China

Dr. Gongmei Yang

Centre for Energy and Resource Technology, Cranfield University,
Swindon SN6 8LA, UK

Deadline for manuscript submissions

closed (10 September 2023)

About the Journal

Message from the Editorial Board

Now more than ever, research is asked to deliver knowledge and technologies to solve the major challenges faced by our society. The development of new materials and devices for (without the ambition to be exhaustive) energy, health and food technology, together with the need for establishing processes that reduce the impact on critical resources and the environment, is indeed in the spotlight of most contemporary research. Surface science and engineering play a key role in this regard, with an incredible potential in delivering new and deep scientific understanding and technical solutions essential to solve most of the major societal challenges.

Coatings is a well-established, peerreviewed, online journal dedicated to the vibrant field of surface science and engineering. Coatings publishes original research articles that report cutting-edge results and review papers that make the point on the hottest research topics.

Editors-in-Chief

Prof. Dr. Wei Pan

State Key Laboratory of New Ceramics and Fine Processing, School of Materials Science & Engineering, Tsinghua University, Beijing 100084, China

Dr. Emerson Coy

NanoBioMedical Centre, Adam Mickiewicz University in Poznań, ul. Wszechnicy Piastowskiej 3, 61-614 Poznań, Poland

Author Benefits

Open Access

— free for readers, with article processing charges (APC) paid by authors or their institutions.
