

## Special Issue

# The Relationship between Surfaces Coating and Biological, Mechanical and Clinical Behaviour

### Message from the Guest Editors

This Special Issue is to investigate the dental materials, evaluating how different clinical/laboratorial parameters can influence the mechanical and biological characteristics of these materials.

- Theoretical and experimental research, knowledge, and new ideas on the evaluation of the modification of dental materials surfaces over time
- Recent developments in multi-functional organic, inorganic, and hybrid coatings
- Surface modifications produced by different processes, including, but not limiting to, additive and subtractive manufacturing processes, sandblasting, etching, thermal spray, laser and plasma processing, plating, etc.
- Mechanical evaluation of the surface's coating modification through dynamic loading and corrosion
- Biological and mechanical tests considering the interplay between the biological mechanical, chemical, and electrochemical interactions, and the ability to predict performance and/or reliability
- Analysis of the cytocompatibility and bioactive properties of different coating materials and coating morphology
- Computer modeling and simulation to predict coating properties, performance, durability, and reliability

### Guest Editors

Dr. Roberto Lo Giudice

Department of Human Pathology of adults and developmental age,  
Messina University, 98100 Messina, Italy

Dr. João Paulo Mandes Tribst

Department of Reconstructive Dentistry, Academic Centre for Dentistry  
Amsterdam (ACTA), Amsterdam, Netherlands

### Deadline for manuscript submissions

closed (1 January 2022)

## About the Journal

### Message from the Editorial Board

Now more than ever, research is asked to deliver knowledge and technologies to solve the major challenges faced by our society. The development of new materials and devices for (without the ambition to be exhaustive) energy, health and food technology, together with the need for establishing processes that reduce the impact on critical resources and the environment, is indeed in the spotlight of most contemporary research. Surface science and engineering play a key role in this regard, with an incredible potential in delivering new and deep scientific understanding and technical solutions essential to solve most of the major societal challenges.

Coatings is a well-established, peerreviewed, online journal dedicated to the vibrant field of surface science and engineering. Coatings publishes original research articles that report cutting-edge results and review papers that make the point on the hottest research topics.

---

### Editors-in-Chief

Prof. Dr. Wei Pan

State Key Laboratory of New Ceramics and Fine Processing, School of Materials Science & Engineering, Tsinghua University, Beijing 100084, China

Dr. Emerson Coy

NanoBioMedical Centre, Adam Mickiewicz University in Poznań, ul. Wszechnicy Piastowskiej 3, 61-614 Poznań, Poland

---

### Author Benefits

#### Open Access

— free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Inspec, Ei Compendex, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Physics, Applied) / CiteScore - Q2 (Surfaces, Coatings and Films)
