

Special Issue

Antibacterial Coatings and Biofilm

Message from the Guest Editor

Food safety is a global issue with major impact on human health. Antimicrobial coating for medical application is among the pylon-generating segment but, globally, the market for antimicrobial coating for food and beverage has been increasing due to food industry, the key drivers for the market. The recent market research analysis identifies the growing demand for packaged food as one of the key growth factors for the global antimicrobial coatings market. The extensive use of antimicrobial coatings can help in reducing food wastage. This Special Issue of *Coatings* is intended to provide a forum for original research articles as well as critical reviews on current advances in the field of antimicrobial coatings and biofilms. Areas of interest include, but are not limited to: - Characterization and development of bioactive and antimicrobial coatings/films/packaging - Coatings and biofilms applications - Innovative coatings formulations - Coatings application in food industry, food packaging, and medical industry

About the Journal

Message from the Editorial Board

Now more than ever, research is asked to deliver knowledge and technologies to solve the major challenges faced by our society. The development of new materials and devices for (without the ambition to be exhaustive) energy, health and food technology, together with the need for establishing processes that reduce the impact on critical resources and the environment, is indeed in the spotlight of most contemporary research. Surface science and engineering play a key role in this regard, with an incredible potential in delivering new and deep scientific understanding and technical solutions essential to solve most of the major societal challenges.

Coatings is a well-established, peerreviewed, online journal dedicated to the vibrant field of surface science and engineering. Coatings publishes original research articles that report cutting-edge results and review papers that make the point on the hottest research topics.

Editors-in-Chief

Prof. Dr. Wei Pan

State Key Laboratory of New Ceramics and Fine Processing, School of Materials Science & Engineering, Tsinghua University, Beijing 100084, China

Dr. Emerson Coy

NanoBioMedical Centre, Adam Mickiewicz University in Poznań, ul. Wszechnicy Piastowskiej 3, 61-614 Poznań, Poland
