

Special Issue

Deposition, Characterization and Application of Anti-corrosion and Lubricating Coatings

Message from the Guest Editors

The aim of this Special Issue is to understand the basic principles of deposition, characterization and application of anti-corrosion and lubricating coatings. The scope of this Special Issue will serve as a forum for papers in the following concepts:

- Theoretical and experimental research, knowledge and new ideas in anti-corrosion and preventive coatings mechanisms;
- Recent developments and application in anti-corrosion and lubricating coatings;
- Anti-corrosion and lubricating coatings produced by different processing and deposition methods;
- Understanding the degradation mechanisms of coatings through friction, wear or other dynamic loading condition and corrosion;
- Computer modeling, simulation to predict coating properties, performance, durability and reliability in service environments.

It is our pleasure to invite you to submit your article to this Special Issue. We look forward to receiving your paper for the Special Issue “Deposition, Characterization and Application of Anti-corrosion and Lubricating Coatings” of MDPI’s *Coatings*.

About the Journal

Message from the Editorial Board

Now more than ever, research is asked to deliver knowledge and technologies to solve the major challenges faced by our society. The development of new materials and devices for (without the ambition to be exhaustive) energy, health and food technology, together with the need for establishing processes that reduce the impact on critical resources and the environment, is indeed in the spotlight of most contemporary research. Surface science and engineering play a key role in this regard, with an incredible potential in delivering new and deep scientific understanding and technical solutions essential to solve most of the major societal challenges.

Coatings is a well-established, peerreviewed, online journal dedicated to the vibrant field of surface science and engineering. Coatings publishes original research articles that report cutting-edge results and review papers that make the point on the hottest research topics.

Editors-in-Chief

Prof. Dr. Wei Pan

State Key Laboratory of New Ceramics and Fine Processing, School of Materials Science & Engineering, Tsinghua University, Beijing 100084, China

Dr. Emerson Coy

NanoBioMedical Centre, Adam Mickiewicz University in Poznań, ul. Wszechnicy Piastowskiej 3, 61-614 Poznań, Poland
