

Special Issue

Biomaterials and Antimicrobial Coatings

Message from the Guest Editors

Recently, the materials science field has been rapidly expanding and the area of biomaterials is one of the most studied due to its importance at a global level. In the past few decades, numerous significant advances have been registered in the technology of biomedical coatings and materials with multiple uses in medicine, dentistry, pharmaceuticals, and the food industry. Furthermore, great importance has been attributed to the development of biomaterials with antimicrobial properties due to their tremendous potential in the development of novel antimicrobial agents. Thus, significant efforts have been made to develop new and improved nanocomposites with biocompatible properties and antimicrobial activity to be used in biomedical applications. In this context, this Special Issue is focused on the development of biomaterials with antimicrobial properties for biomedical applications. About the Topics of Interest In particular, the topics of interest include but are not limited to the following:

- Biomaterials
- Antimicrobial properties
- Biocompatible coatings
- Biocompatible coatings with antimicrobial properties

About the Journal

Message from the Editorial Board

Now more than ever, research is asked to deliver knowledge and technologies to solve the major challenges faced by our society. The development of new materials and devices for (without the ambition to be exhaustive) energy, health and food technology, together with the need for establishing processes that reduce the impact on critical resources and the environment, is indeed in the spotlight of most contemporary research. Surface science and engineering play a key role in this regard, with an incredible potential in delivering new and deep scientific understanding and technical solutions essential to solve most of the major societal challenges.

Coatings is a well-established, peerreviewed, online journal dedicated to the vibrant field of surface science and engineering. Coatings publishes original research articles that report cutting-edge results and review papers that make the point on the hottest research topics.

Editors-in-Chief

Prof. Dr. Wei Pan

State Key Laboratory of New Ceramics and Fine Processing, School of Materials Science & Engineering, Tsinghua University, Beijing 100084, China

Dr. Emerson Coy

NanoBioMedical Centre, Adam Mickiewicz University in Poznań, ul. Wszechnicy Piastowskiej 3, 61-614 Poznań, Poland

Author Benefits

Open Access

— free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Physics, Applied) / CiteScore - Q2 (Surfaces, Coatings and Films)
